

Greer Stafford/SJCF Architecture is looking for an experienced licensed Architect and project manager to lead educational, recreational, and civic projects. We have an immediate full-time opening for an organized, motivated, and detail oriented architect looking for growth in a stable, open work environment. We offer impressive perks and benefits and support our team members in their professional development through continuing education programs, professional training, community involvement and a fun and relaxed atmosphere.

The ideal candidate will have a professional degree in architecture, is licensed in New Mexico or has the ability for a reciprocal license in New Mexico, has 7-10 years of project management experience in commercial projects, has strong technical capabilities, can lead the design and production process under a principle architect, plus:

- Strong proficiency in Revit and AutoCAD
- Experience with other design, production, and communication software, i.e. SketchUp, Adobe Suite, MS Office, Enscape or other rendering engines, etc.
- Ability to handle multiple projects
- Excellent interpersonal skills to communicate effectively with design team, clients and contractors
- Able to work independently as well as collaboratively in an open-office environment

Please send your resume to us at careers@greer-stafford.com and we'll fill you in on the details.
